

Press Release

Harris Announces Financial Management Software for i-nHANCE Small Business Customers

Tyler, Texas – February 15, 2006 In October of 2005, Harris introduced a financial solution to our i-nHance Small Business (ISB) customers at our Annual Customer Conference. This was in direct response to our ISB customers request for an accounting system developed by our Tyler Development group. This robust system is designed to interface with your current ISB software system.

Due to advances in technology we are now able to offer our ISB customers the same Windows based Financial Management system that our customers using the i-nHANCE Utility Solutions program use, but at a much lower price point. This system is currently in Version 4 release and has proven its stability and reliability by being on the market since 1998.

With ISB Financials, you will now have a full suite of products working together to manage your operations, with the same dedicated support staff available to assist you with any questions that you may have.

We appreciate your continued support of our products and services and look forward to continuing our relationship with you in the future. For more information, please call Debra at 800-259-8222, ext. 201 or speak to your support representative.
